TREND BEYOND

2020/21

## Keep moving FORWARD...

We are living in an era of innovative interventions and leading-edge advancements. In order to stay ahead and relevant in the market, we need to move forward and constantly progress. This is more so with trending colours, driving the progression that can redefine consumers' discernment, especially in Asia.

As Asia's No.1 Paint & Coatings Expert, Nippon Paint has taken on the leadership role in developing 'Trend Beyond Colours' – a truly Asian Colour Palette.

In forecasting this series of enthralling Asian colour palettes, Nippon Paint is collaborating with Colour Hive, a company with 19 years of experience in forecasting colour trends across continents, to curate forward-thinking colour inspirations for the Asian region.

Leveraging on our positioning as The Paints & Coatings Expert, Nippon Paint continues to push the boundaries on the colour innovation front – as we now present our next instalment of Trend Beyond Colours 2020/2021.

The four inspiring key themes of Trend Beyond Colours 2020/2021 – 'Precious Tale', 'Gentle Whisper', 'Pop Life',

and 'Raw Beauty', explore the progression from our previous themes. Each story embodies eight distinctive colours which come in the form of unique decorative coatings, with the ability to elevate the essence of Asia and influence the lives of its people.

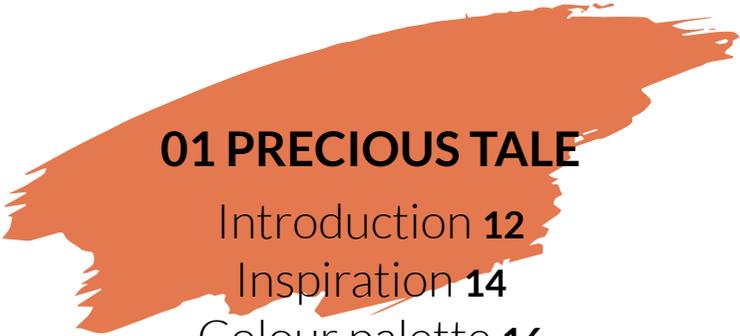

At the same time, we are redefining colours incorporating textures through our special effects range to bring a unique approach and aesthetic value – to meet the needs of the ever-progressing consumers.

We believe that Trend Beyond Colours 2020/2021 shall and will become an integrated part of our consumers' lives – inspiring them to re-think coatings and re-create possibilities on all surfaces. We hope that this book will be an inspiration for design professionals in pushing the boundaries of creative expression across multiple-cultures, platforms and industries, recognizing and understanding the diverse sophistication of our Asian consumers.

At Colour Hive we curate the driving forces in colour trends across continents, and are always inspired by the sophisticated and forward-thinking colour nuances of the Asian region. In this, our second trend and colour forecast collaboration with Nippon Paint, we are able to chart the progression of stories into this new year 2020/2021. As Asian innovation continues to lead the way in colour trends, we are proud to be part of this exciting exploration of the future.

Connectivity and cultural symbiosis ensure that the future of colour and design holds endless possibilities. In this period of unprecedented globalisation, we

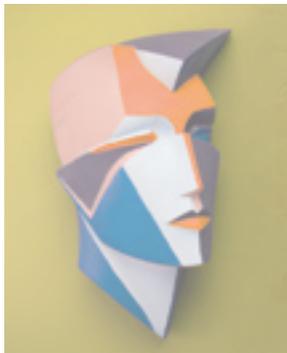

observe how technological movements and cultures are swiftly shared, and in turn influence design aesthetics across the world. In balancing these global trends with the precious familiarity of localism and regionalism in Asia, we have designed a colour and finish palette that feels at once fresh and comforting.

The four trends presented in this book are a considered look into the future. Born from a global perspective and tailored to the unique essence of the Asian continent, we welcome you on this 2020/21 journey into Trend Beyond Colours.

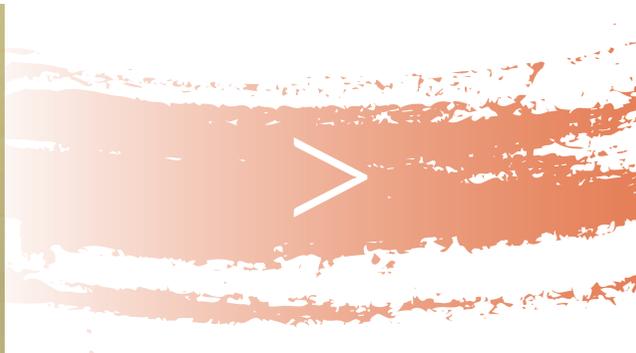

# 18/19

CONSCIOUS BEING

# 20/21

PRECIOUS TALE

Previously, Conscious Being considered the influence of technology on our everyday lives. Now, in 20/21, the societal trend Precious Tale instead re-evaluates what is precious by redefining our perception of luxury.

# 18/19

ESSENTIAL BALANCE

# 20/21

GENTLE WHISPER

In the 18/19 trend Essential Balance, we looked to create meditative calm with references to purity and nature. This year, we embrace neutrality with a technological undertone welcoming more intriguing purple tinted tones and pushing this theme in new directions.

18/19

TRANSIENT GLOW

20/21

POP LIFE

The spirited nature of Transient Glow develops into the 20/21 trend Pop Life. This story embraces a deliberately carefree attitude, represented by bright, punchy colours. These new bold shades make for an unapologetically upbeat and fun palette.

18/19

SEEKING ADVENTURE

20/21

RAW BEAUTY

Past trend Seeking Adventure took us to the edges of the earth and into the sea with a fearless attitude. The exploration continues as we turn our focus to the land for 20/21. A profound respect for nature is reflected in a warm earthy palette paired with organic green shades.

# INFLUENCES

Forecasting is a journey, and to arrive at our trends and colour stories, we must first explore the social, technological, environmental, economic and political influences that shape them. These six most important trend drivers form the basis of our 2020/21 Trend Beyond Colours.

## ^ URBAN NATURE

Population density and increasingly built-up cities make us yearn for the vast open spaces of the natural world. To ease this, urban planning has become fascinated with wildlife, often taking the shape of vertical green spaces that filter air pollution and dust and lower temperatures in city centres. These sites of urban wilderness provide endless possibilities for designers and architects.

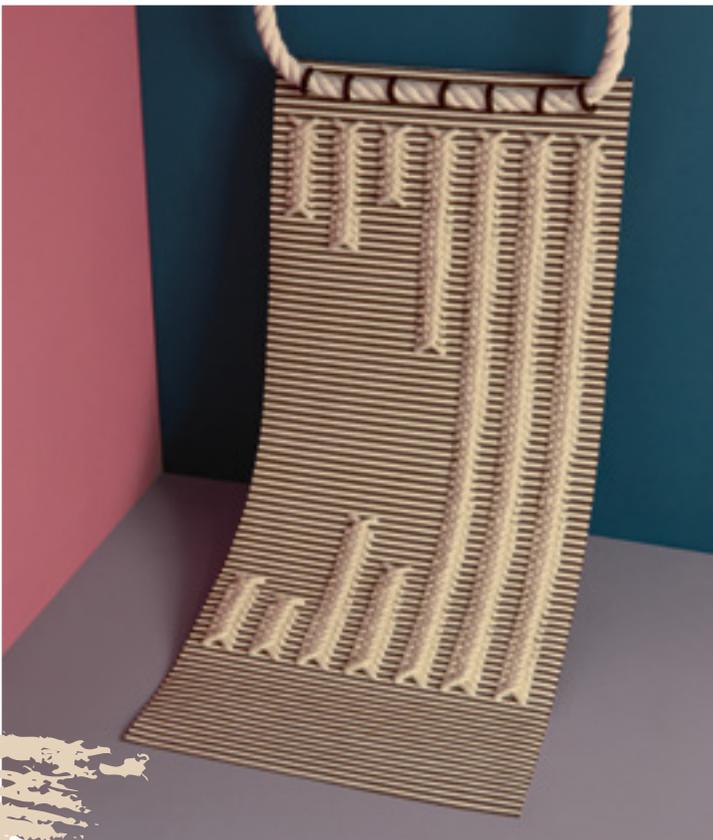

## ^ REWILDING

A growing consciousness of the fragility of our environment leads us to reconnect with forgotten wildlife. Widespread repair of disrupted ecosystems involves the reintroduction of native species to their habitats. This active 'rewilding' is a restoration of past human-nature relationships, where harmony between the two was essential. Across the globe, this attention to indigenous plant and animal species is becoming ever more important.

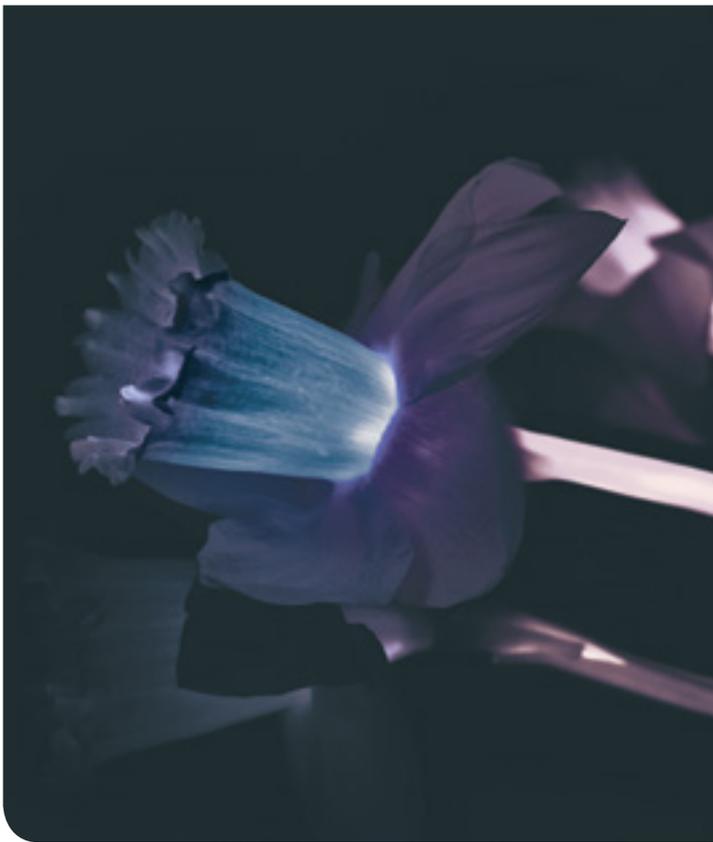

## ∨ LUXURY CRAFT

Traditional ideas of luxury are concerned with material rarity and expense. Yet the speed of modern life raises a new question as to what defines luxury, and what is precious? The answer is 'time'. This will be expressed through a renewed appreciation of slow hand crafts and artisan skills. A new generation of designers is reinventing these traditional practices to contemporary effect.

## ∧ PLAYFUL INDULGENCE

Designers are embracing a more colourful and spirited approach as a reaction to routines and restrictions. Finding joy in the unexpected, this aesthetic is inspired by lively artwork and light-hearted imagery radiating with positivity. An exploration of the juxtaposition of unlikely colour companions and bold yet playful geometric forms is at the heart of this optimistic and colourful trend driver.

## △ EMPATHETIC TECH

A desire for sanctuary spaces emerges as we seek refuge from our loud and crowded urban lives. Here, embracing technology can enhance our comfort and wellbeing through the abilities of intelligent machines. With the seemingly transcendent ability of artificial intelligence to embed even the most ordinary objects with extraordinary capabilities, the bridge between humans and machines is being empathetically crossed.

## △ CONSIDERED NEUTRALITY

Within the narrative of a polarized future emerges a desire to find peace within a neutral space. Designers are celebrating the middle ground, revisiting notions of stability, consideration, and consciousness. Often, this tendency to reconsider perspective takes shape in tonal, unsaturated colour palettes and softly reassuring textures. Key to this narrative is the aspirational principle of balance in designed spaces.

# PRECIOUS TALE

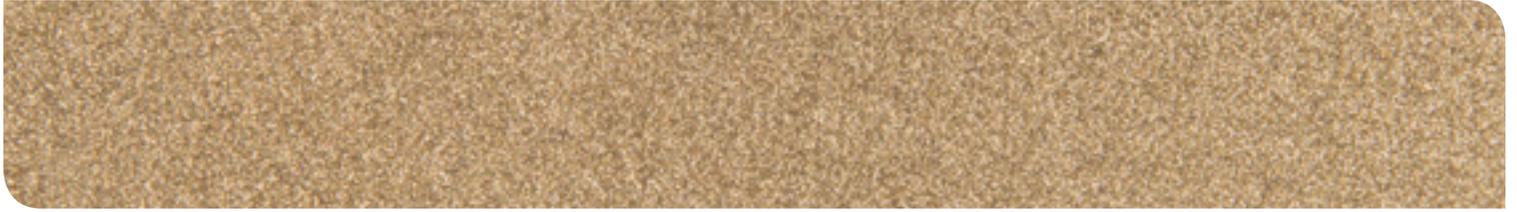

In Precious Tale, we reconsider what defines a sense of place and permanence in an increasingly ephemeral world. Redefining modern luxury as the union of fine materials with a fresher, more global aesthetic. Storytelling is important to this trend as it considers how, with less space in which to live, we can say more through elegance and ornamentation.

Modern urbanites encounter less space with which to individualize, yet creative approaches to luxury are making interior spaces feel personal. Precious materials are met with contemporary decoration, emphasizing the beauty of the visual narrative. Adornment through colour and surface becomes the way in which we tell our stories.

A position of neutrality may be considered the rejection of certainty. Yet, this story *explores the fine art of neutrality* in its crafted and carefully considered beauty. With a *focus on balance*, and sense of *understated serenity*, we explore the possibility of the delicate grey area. In stripping back the excess, we *reconsider the soft-spoken* magnificence of neutrality.
